Patient Safety

EMERGENCY CART MEDICATION AND EQUIPMENT

Class 1 Facility: General Anesthesia

Top of Cart: Defibrillator/Lead II Monitoring Equipment

- ACLS algorithms and drug information (binder or laminated cards for easy reference)
- Clipboard with arrest forms (triplicate copy) and pen
- CPR backboard
- Defibrillator/monitor which includes ECG, cardioversion, external pacing and pulse oximetry capabilities
- Lead II monitoring cable (1)
- Electrodes
- Combo (defibrillator/ECG/pacing) pads (2 sets)
- Defibrillator gel pads (2)
- Monitor paper in printer, as appropriate
- Self-inflating bag-valve-mask
- Emergency oxygen tanks (2) with regulator and nipple attached
- Portable battery operated suction with Yankauer attached
- Stethoscope
- Gloves

Airway Equipment

- Stylettes (2)
- Laryngoscope handles (2)
- Laryngoscope blades #3 curved and #4 curved
EMERGENCY CART MEDICATION AND EQUIPMENT – CLASS 1 FACILITY

- Laryngoscope bulb (1) *(as appropriate)*
- Extra batteries for laryngoscope handle
- ET tubes sizes 6, 6.5, 7, 7.5, 8, 8.5
- Rescue airways (e.g. supraglottic airway - King Systems sizes 3, 4 and 5 or classic LMA sizes 3, 4 and 5)
- Oral airways sizes 8 cm, 9 cm, 10 cm (1 each)
- Lidocaine spray with nozzle (1)
- Lidocaine jelly 2%
- ETT ties or tape
- Syringe 10 cc (1)
- Magill forceps
- Easy Cap CO₂ detector
- Yankauer suction (2)
- Deep suction catheters (2)

**Medications**

*(Unless quantity specified, medications are in sufficient quantities to provide emergency care as outlined in the ACLS algorithms)*

- Adenosine
- Amiodarone
- Antihypertensive (hydralazine or nifedipine)
- ASA – non-enteric coated
- Atropine
- Beta blocker (one of metoprolol, propranolol, esmolol)
- Dextrose 50%
- Diphenhydramine
- Ephedrine
- Epinephrine
- Flumazenil
- Furosemide
- Hydrocortisone
- Labetalol
- Lidocaine
EMERGENCY CART MEDICATION AND EQUIPMENT – CLASS 1 FACILITY

- Midazolam
- Lipid emulsion (if using bupivacaine or ropivacaine)
- Morphine
- Naloxone
- Nitroglycerine spray
- Phenylephrine
- Salbutamol puffer with spacer
- Sodium bicarbonate
- Sodium dantrolene (36 vials)
- Succinylcholine
- Vasopressin
- Verapamil

### IV and Medication Preparation Equipment

- IV tubing (2 sets)
- Normal saline 500 ml (2) and 1,000 ml (1)
- D5W 250 ml (1)
- Minibags 50 cc and 100 cc
- Artificial colloid (1 bag)
- Tourniquet
- Alcohol swabs
- IV cannula sizes 18-22G (2 of each size)
- Small transparent dressings
- 2x2 gauze
- Tape
- Razors (2)
- Medication labels
- NS 10 ml vials (5)
- Syringes 10 ml (4)
- Syringes 3 ml with needle (3)
- Needles (various sizes)
### Gastric Tube Supplies
- Gastric tubes sizes 14F and 16F
- Lubricant
- Catheter tip syringe 60 ml (1)
- Suction tubing (1)
- Anti-reflux valve (1)

### Additional Supplies
- Glucometer (readily available in the facility)
- Sterile gloves
- Scissors
- Pen light
- Sharps container
- Emergency cuffed cricothyrotomy set in a size appropriate to the facility’s patient population (1)
- Pressure bag (1)
- Non-rebreather oxygen mask (2)
- Simple oxygen mask (2)

### Pediatric Supplies (as appropriate)
- PALS algorithms and drug information
- Pediatric length-based resuscitation tape
- Pediatric defibrillator/monitor which includes ECG, cardioversion, external pacing and pulse oximetry capabilities
- Lead II monitoring cable (1)
- Pediatric electrodes
- Pediatric combo (defibrillator/ECG/pacing) pads (2 sets)
- Pediatric defibrillator gel pads (2)
- Pediatric self-inflating bag-valve-mask
- Pediatric stylettes (2)
EMERGENCY CART MEDICATION AND EQUIPMENT – CLASS 1 FACILITY

- Pediatric laryngoscope handle (2)
- Pediatric laryngoscope blades Mac size 1 and 2
- Laryngoscope bulb (1) (as appropriate)
- Extra batteries for laryngoscope handle
- ET tubes sizes 4.0, 4.5, 5.0, 5.5, cuffed and uncuffed
- Rescue airways classic LMA sizes 1.5, 2.0, 2.5
- Oral airways sizes 60 mm, 70 mm and 80 mm
- Pediatric Magill forceps
- Pediatric non-rebreather oxygen masks (in sizes appropriate to expected range of patient size and age) or Jackson-Reese T-Piece device
- Pediatric simple oxygen masks (in sizes appropriate to expected range of patient size and age)
- Intraosseous needles sizes 16G and 18G
- Intravenous infusion pump
- Intravenous infusion pump tubing (2)
- IV cannula sizes 24G (2) and 22G (2)
- Butterfly needles sizes 19-25G
- Arm boards
- Gastric tubes sizes 10F and 12F
- BP apparatus and cuffs (in sizes appropriate to expected patient size and age)
