## [Drug Programs \[1\]](#)

The drug programs department has several functions:

- Oversight of the quality assurance activities of the [Prescription Review Program \(PRP\)](#) [2]. The PRP is an educational and remedial program, which assists physicians with the challenging task of prescribing opioids, benzodiazepines, stimulants and other potentially addictive medications with appropriate caution. The work of the program is informed by the PharmaNet database.
- Administration of the [Controlled Prescription Program](#) [3] pertaining to ordering of duplicate and methadone prescription pads.

For information about methadone for opioid use disorder, contact the [BC Centre on Substance Use](#) [4].
